

SUPPORT

ADJUSTABLE SUPPORT FOR TERRACES

THREE VERSIONS

The Small version (SUP-S) can be raised by up to 37 mm, the Medium version (SUP-M) by up to 220 mm and the Large version (SUP-L) by up to 1020 mm. All versions are height adjustable.

STRENGTH

Sturdy system suitable for heavy loads. The Small (SUP-S) and Medium (SUP-M) versions can handle up to 400 kg. The Large version (SUP-L) can handle up to 800 kg.

COMBINABLE

All versions can be combined with a special head to facilitate lateral fastening to the joist, which may be made of either wood or aluminium. A tile adapter is also available on request.

CHARACTERISTICS

FOCUS	extreme versatility in levelling
HEIGHT	from 22 mm to 1020 mm
LOWER BASE	SUP-S Ø 150 mm SUP-M and SUP-L Ø 200 mm
STRENGTH	from 400 to 800 kg

MATERIAL

Polypropylene (PP).

FIELDS OF USE

Raising and levelling of the substructure. Outdoor use. Suitable for service classes 1-2-3.

DURABILITY

UV-resistant and suitable also for aggressive environment conditions. Ideal for use in combination with ALU TERRACE.

ALU TERRACE

Ideal for use in combination with ALU TERRACE, fixed laterally with KKA screws. System with excellent durability.

Fastening wooden joists on SUP-M support with head.

Patio made with ceramic tiles on SUP-M with special adapter. ➤

SUP-S INSTALLATION

Simply set the joist on the SUP-S or screw it to the SUP-S with 4,5 mm diameter KKF screws.

INSTALLATION OF SUP-S WITH SUPSLHEAD1

Place the head SUPSLHEAD1 on the SUP-S and fix the joist with 4,5 mm diameter KKF screws.

INSTALLATION OF SUP-M WITH SUPMHEAD1

Place the head SUPMHEAD1 on the SUP-M and fix the joist laterally with 4,5 mm diameter KKF screws.

INSTALLATION OF SUP-M WITH SUPMHEAD2

Place the head SUPMHEAD2 on the SUP-M and fix the joist with KKF 4,5 mm diameter screws.

■ INSTALLATION OF SUP-L WITH SUPSLHEAD1

Place the head SUPSLHEAD1 on the SUP-L, adjust the height of the base as needed and fix the joist laterally with 4,5 mm diameter KKF screws.

■ INSTALLATION OF SUP-L WITH SUPSLHEAD1

Add the SUPLEXT100 extension to the SUP-L support and then position the SUPSLHEAD1 head. Adjust the height of the base as needed and fix the joist laterally with 4,5 mm diameter KKF screws.
