| 1        | <p><b>HEAVY METAL ANCHORS WITH CLAMP:</b><br/> Supply and installation, as provided for in the technical drawings of the project, of fully threaded internal <b>heavy metal anchors with clamp</b>, with diameter Ø = ... mm length L = ... mm and nut with diameter Ø = ... mm, <b>HEAVY METAL ANCHORS WITH CLAMP</b> marketed by Rotho Blaas srl (<a href="http://www.rothoblaas.com">www.rothoblaas.com</a>), having the following characteristics:</p> <ul style="list-style-type: none"> <li>- 8.8 quality steel according to EN ISO 898-1</li> <li>- galvanic zinc with minimum thickness 5 µm</li> <li>- anchors designed to withstand heavy loads on concrete supports in tension zones, cracked and not cracked.</li> <li>- ETA option 1 for applications on cracked concrete</li> <li>- CE marking for construction products in accordance with Directive 89/106/CEE in compliance with ETAG 001 guidelines</li> </ul> <p>Furthermore, the anchors are to be in possession of a conical expansion body with a rounded end, especially robust internal threading, polyethylene spacer to avoid initial rotation during tightening, incisions on the surface showing the proper installation depth, expansion clamp in steel, washer with hexagonal nut and head indicating the total length.</p> <p>Installation must be carried out in a properly pre-drilled pilot hole (10 mm hole deeper than the length of the piling with hole diameter = anchor diameter), screwing in the anchor and nut by hand, applying a torque coupling in accordance with the technical drawings of the project.</p> <p>These indications are given in order to perform supply and installation to the best working standards.</p>  | each                | ... €/each     | ... €       |
