

VERTIGRIP A4

VERTICAL LIFELINE WITH A4 STAINLESS STEEL ELEMENTS

A4
AISI 316

CE

EN
353-1:2014
+ A1:2017

RFU 11.119

STRONG

AISI 316 stainless steel elements provide excellent corrosion resistance in marine and industrial environments.

TOTAL CONTROL

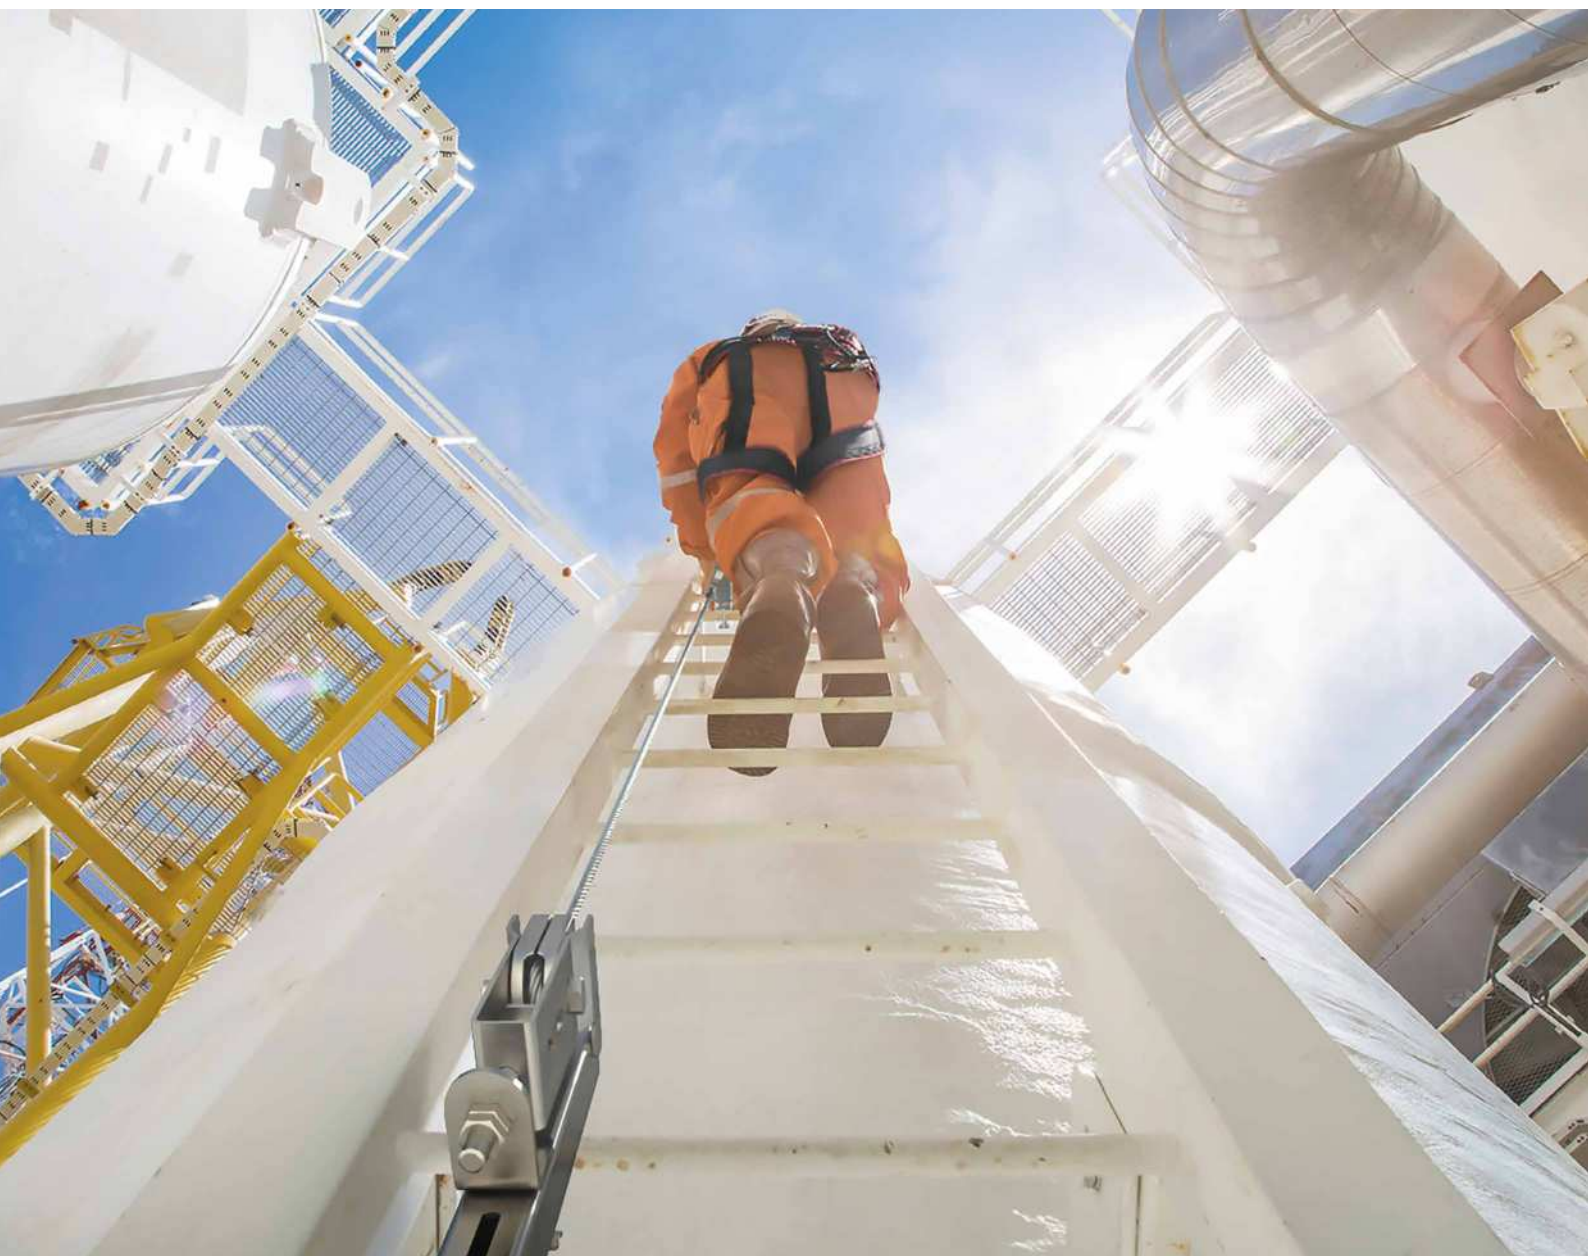

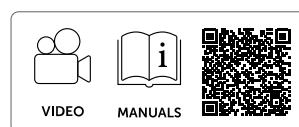

Guided type fall arrester on rope with integrated energy absorber, which allows a controlled ascent and descent in safe conditions.

FUNCTIONAL

It can be installed on walls inclined at an angle of up to 15° from the vertical.

▼ Installation of VERTIGRIP A4 vertical lifeline on a ladder for maintenance of an offshore installation.
