

V-RAIL

VERTICAL RAIL SYSTEM

RFU 11.119

TOTAL CONTROL

Guided type fall arrester with integrated energy absorber, which allows a controlled ascent and descent in safe conditions.

FUNCTIONAL

It can be installed on walls inclined at an angle of up to 15° from the vertical.

PRACTICAL

Possibility of off-centre assembly of the system on a ladder.

TYPES OF APPLICATION

▼ Installation of V-RAIL rail on existing ladder for roof maintenance.

VRAILSLIDE

Sliding device with integrated energy absorber allowing vertical movements in comfort and safety.

RAILENDOPEN

Openable end element allowing fast and safe entry into the system using the standard sliding device.

VRAILBRAL

Support for vertical rail adaptable to any standard ladder. Simple to install.

RAIL3000

Available in various RAL colours on request.
