

# GROUND COVER

## ANTI-VEGETATION TARP FOR SUBSTRATES

### PERMEABLE

The anti-vegetation tarp prevents the growth of grasses and roots, protecting the patio substructure from the ground. Permeable to water, allowing it to flow off.

### STRONG

The polypropylene non-woven fabric (0.010 lb/ft<sup>2</sup>) effectively separates the patio substructure from the ground. Dimensions optimised for patios (5.3 x 32.8 ft).

| CODE    | material | [lb/ft <sup>2</sup> ] | H x L    |            | A                 |                    | pcs |

# NAG

## LEVELING PAD

### OVERLAPPABLE

Available in 3 thicknesses (1/16", 1/8" and 3/16"), can also be overlapped to obtain different thicknesses and thus effectively level the patio substructure.

### DURABILITY

The EPDM material guarantees excellent durability, is not subject to sagging in time and does not suffer from exposure to sunlight.
