1	SKR SCREW-IN ANCHORS: Supply and installation, as provided for in the technical drawings of the project, of partially threaded screw-in anchors, with diameter $\varnothing = \dots$ mm with length $L = \dots$ mm and diameter nut $\varnothing = \dots$ mm, SKR ANCHORS produced and marketed by Rotho Blaas srl (www.rothoblaas.com), having the following characteristics: - steel with $f_{u,k} \geq 1000 \text{ N/mm}^2$ - white galvanic zinc with minimum thickness $12 \mu\text{m}$ with coating in Cr^{3+} - maximum screw coupling 50 kN Furthermore, the anchors are to be in possession of one conical head with initial serrated threading (that creates a thread in concrete, guaranteeing limited expansion forces), a double partial parallel thread with connecting thickness $S = \dots$ mm and hexagonal head. Installation must be carried out in a properly pre-drilled pilot hole (10 mm hole deeper than the length of the piling with hole diameter = anchor diameter), screwing in by hand, applying a torque coupling in accordance with the technical drawings of the project and however lower than 50 kN. These indications are given in order to perform supply and installation to the best working standards. 	each	... €/each	... €
