1	TENSIONER FOR THE CREATION OF BRACINGS: Supply and installation, as provided for in the technical drawings of the project, of a tensioner in compliance with norm DIN 1478 in steel with an inspection hole for the creation of bracings, with diameter $\varnothing = \dots$ mm, length $L = \dots$ mm and minimum resistance $R_{u,k} = \dots$ kN, TENSIONER WITH AN INSPECTION HOLE marketed by Rotho Blaas srl (www.rothoblaas.com), having the following characteristics: - S355 class steel with $f_{u,k} \geq 355 \text{ N/mm}^2$ - galvanic zinc coating - geometry according to DIN 1478 - inspection hole Furthermore, the end of the tensioner is to be in possession of internal threads which are metric opposite to each other and a tensioner must have a central passing hole, for tensioning by means of a suitable bar. Installation can be carried out with a threaded bar or double drawn bar with a diameter based on the diameter of the tensioner. These indications are given in order to perform supply and installation to the best working standards. 	each	... €/each	... €
