

ELEVATOR

MOVEABLE ROPE LOCK FOR ASCENT

CE
EN 567
EN 12841/B

ELELEF

ELERIG

- Material: **aluminium alloy**
- Application: moveable rope lock for ascent, in right and left version
- Excellent locking ability for rope that are particularly muddy thanks to the evacuation grooves in the cam and on the side
- Excellent resistance to wear, fragility reduced

New ergonomic click opening, easy to manoeuvre and well protected from impacts and the risk of accidental opening. Equipped with cam anti-torsion system.
